The Bullard 88VXUGK offers users of the 88 Series airline respirator the convenience of upgrading the 88 Series Respirator to the standards of the new 88VX™ Series Respirator through this complete, ready-to-assemble kit. This kit is available through April 2, 2002.

The 88VXUGK Advantage

Enhanced Features

Now you can enjoy the advantages provided in the new 88VX by upgrading your 88 Series respirator with one convenient kit offering advancements in fit, comfort, performance, and protection.

The Components

The **88VXUGK** includes the following components for complete and easy assembly and offers 88VX quality and advantages in your 88 Series respirator.

- **99PL** advanced engineered polymer inner shell and air plenum assembly, providing reliability, comfort, and overall fit
- **88VXTG** adjustable headband suspension, incorporating new engineering techniques and components for greater durability and comfort
- **46VX** 28" nylon cape utilizing an advanced double lining cuff in an expanded neck area, for improved protection and comfort. Breathing tube positioning loops are installed on the back of the cape for use at wearer's option. The cape latching device is positioned underneath the helmet door frame, for prevention of accidental release.
- **88VXBT** breathing tube, engineered from a unique and proprietary polymer designed to provide enhanced flexibility, comfort, and durability
- **88VXAK** window frame and gasket, catch, bail, and hinge pin, providing in one convenient package, all of the advanced engineered door, gasket, and latch assembly components that are critical for proper upgrading and maintenance of the respirator helmet, to 88VX standards
- **771B** acetate inner lens
